

AZ JOINERY

CUSTOM JOINERY / SYDNEY

Crafted for Your Space. Built for Life.

azjoinery.com.au

Considered in every detail.

Made for the room. Made for the way you live.

For more than 12 years, AZ Joinery has created custom cabinetry for homes and projects across Sydney.

From our Chipping Norton workshop, we bring together design, Cabinet Vision drafting, in-house CNC machining, manufacture, delivery and installation.

We work with homeowners, builders, architects and interior designers to translate ideas and drawings into joinery shaped around the space.

SELECTED WORK

04 Kitchens

08 Wardrobes & Bespoke Storage

10 Bathrooms & Vanities

12 Laundries

14 Outdoor & BBQ Kitchens

16 TV Units & Entertainment

BEHIND THE WORK

18 Our process

20 About AZ Joinery

Colour & character.

COLOUR & CHARACTER

Rich
contrast.

Navy framed doors meet timber-toned shelving and an extended seating counter. Glazed cabinetry and a mirrored splashback add depth, while the pale bench keeps each zone visually distinct.

Kitchens.

Two distinctive rooms, each resolved around cooking, storage and daily life.

THE JOINERY

Storage, seating & display.

Full-height cabinetry defines the room. An extended bench combines preparation and casual seating, while vertical detailing and illuminated display shelving add texture and contrast.

SOFTER GEOMETRY

Curve & line.

A rounded benchtop end and cylindrical support soften the island. Tall cabinetry forms a balanced backdrop, with timber tones linking the adjoining spaces.

Depth & contrast.

FLUTED FORM

A dark centre.

A fluted island anchors this kitchen. Timber-toned cabinetry wraps the room, while a long horizontal window draws light across the bench.

DARK CABINETRY

Bold by design.

Tall doors follow the sloping ceiling. The veined island brings a strong contrast to the dark cabinetry.

Classic lines.

A LIGHTER PALETTE

Framed by the room.

Pale framed cabinetry follows the bay window, with open shelves and vertical detailing adding contrast to the clean door fronts.

Wardrobes & Bespoke Storage

From a dressing suite to a fitted wall, custom storage can be both practical and part of the room's architecture.

A connected suite.

A central drawer unit sits within the dressing room, with glazed storage along the perimeter. Illuminated shelving marks the transition to the adjoining bathroom.

Made to fit.

BUILT-IN WARDROBE

Quiet continuity.

Four tall doors, vertical grain and long handles create a restrained elevation beneath the grille.

WINE STORAGE

Shaped by the staircase.

Bottle compartments and open shelving follow the slope of the stair. The fitted arrangement gives an angled space a clear purpose, with storage set into the architecture.

Bathrooms & Vanities

Custom vanities bring storage, proportion and a considered focal point to the bathroom. From a shared space to a compact powder room, the joinery sets the tone.

A lighter presence.

A wall-hung vanity pairs timber-toned drawer fronts with two basins. Horizontal grain connects the cabinetry, while the open floor beneath keeps the composition light.

Different by design.

PAIRED BASINS

Quiet balance.

Doors and central drawers sit beneath a shared benchtop. Two basins and tall mirrors establish a balanced arrangement, with storage held in one continuous run.

POWDER ROOM

Small & striking.

Dark, vertically detailed doors and semicircular handles give this compact vanity a distinctive front.

Utility, considered.

Laundries work hardest when storage, access and movement are planned together. We shape cabinetry around appliances, work surfaces and household routines, bringing the same discipline to utility spaces as the rest of the home.

WOODGRAIN STORAGE

Built around the room.

Full-height cabinetry, open shelving and low drawers form a continuous utility wall, with a separate sink zone positioned beside the external door.

Everything in its place.

STACKED APPLIANCES

A practical rhythm.

Tall cabinetry frames the appliance stack and extends storage towards the ceiling. Cupboards above and below the bench organise the sink zone, while the clear work surface keeps everyday routines straightforward.

Made for open-air living.

ALFRESCO KITCHEN

A room beyond
the walls.

A sheltered cooking zone combines overhead cabinetry, a sink, cooking appliance and continuous work surfaces. The joinery is planned as part of the entertaining area, keeping preparation close to the table.

Designed for the setting.

NEUTRAL ALFRESCO

Quietly integrated.

A long cabinetry run places the sink and storage beneath the opening, with a stepped central section separating the work areas.

BARBECUE JOINERY

Compact & capable.

Dark vertically detailed cabinetry frames the barbecue and under-bench refrigeration, keeping the cooking zone contained within one coordinated run.

Built into the architecture.

MEDIA WALL

A composed
centrepiece.

A curved central surround, illuminated open shelves and low storage form one continuous elevation. The joinery balances display and concealed storage while giving the television a clear architectural setting.

More than a television wall.

FIREPLACE WALL

A strong
centrepiece.

Full-height cabinetry
frames the television and
fireplace. Tall display
niches establish a clear,
symmetrical composition.

LOWLINE STORAGE

Quietly
practical.

A long run of drawer
storage sits beneath the
television and windows,
keeping everyday items
contained while the room
remains visually open.

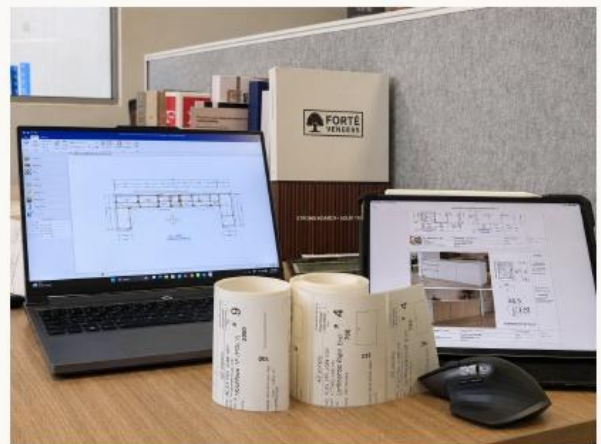

From detail to manufacture.

Design, drafting and production connect the brief to the built joinery.

01 Design & draft.

The project takes shape through design and drafting. Drawings, samples and component details bring the work into focus.

02 Machine.

In-house CNC machinery cuts components for production. The drawing moves from the screen to the workshop floor.

03 Assemble & check.

Cabinet components come together in the workshop. Assembly and checking prepare the joinery for the next stage.

From workshop to your space.

Delivery, site protection and installation carry the work through to its final fit.

04 Delivery.

Delivery links workshop production with site installation. Pictured: the AZ Joinery vehicle at the factory.

05 Protect & install.

Site protection is part of the installation stage. Floor covering and protected cabinetry are visible in this work area.

06 Fit & finish.

The joinery takes its place in the room. Open doors and drawers reveal the fitted layout of this under-stair storage.

The people. The place. The craft.

Based in Chipping Norton, AZ Joinery brings more than 12 years of experience to custom joinery and cabinetmaking across Sydney.

INSIDE THE WORKSHOP

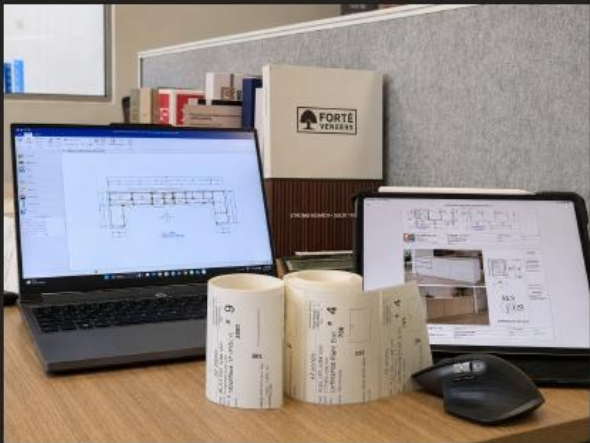

OUR CHIPPING NORTON BASE

From our workshop,
to your project.

Cabinet Vision design and drafting, in-house CNC machinery and our own workshop support the work from planning through to delivery and installation. We work with homeowners, builders, architects and interior designers across Sydney metro.

Selected up close.

Finish, hardware and small construction decisions sit together. This page gives clients a tactile way to read the quality before they reach the final project images.

SELECTIONS, DRAWINGS AND FINISH REFERENCES

STONE MOVEMENT

Veining as a visual feature.

TIMBER TONE

Grain direction and warmth.

HANDLE LINE

Hardware as a fine accent.

INTEGRATED LIGHT

Shadow and display control.

GLASS FRONTS

Display with restraint.

PULL-OUT STORAGE

Storage shaped to fit.

DRAWER FUNCTION

Checked before install.

CURVED EDGE

Softened built-in forms.

CLEAN REVEALS

Alignment does the work.

A compact reference page for designers, builders and homeowners comparing the finer decisions.
